

GONZALO LARROYA

Edinburgh, United Kingdom • +34 616605166 • larroyagonzalo@gmail.com • [GitHub](#)

Proactive Software Developer with a degree in Software Engineering, currently pursuing an MSc in Artificial Intelligence and with almost two years of professional experience in the IT field, including project management, tech support, automation, and optimization. Familiar with Full Stack, DevOps, Cloud Engineering, AI, among other areas, and highly motivated to continue learning.

WORK EXPERIENCE

Freelancing

Sep 2025 - Present

- Building custom websites and AI solutions for clients.

Junior Software Engineer

Smadex
Barcelona, Spain

Oct 2024 - Sep 2025

- Contributed to the development and maintenance of an Angular frontend and Node.js backend.
- Designed and implemented cloud-based architectures and services.
- Implemented AI agentic solutions to automate workflows and enhance application intelligence.
- Developed secure authentication and authorization workflows, including OAuth integration.
- Hands-on experience with monolithic and microservices architecture development.

Intern Software Developer

Avvena
Barcelona, Spain

Jul 2023 - Dec 2023

- Created a [landing page](#) for the company with Next.js.
- Maintained and scaled the backend built with Java and Spring Boot, ensuring optimal performance and reliability as the system grew.
- Collaborated with non-technical teams to understand their needs and ensure product solutions aligned with their requirements.
- Adapted to a SaaS software with no direct mentorship, ensuring continuous progress despite the lack of formal training.

EDUCATION

Bachelor's Degree in Software Engineering

2022 - 2025

- Epitech European Institute of technology, Barcelona.

Master of Science in Artificial Intelligence

2025 - 2026

- Heriot Watt University, Edinburgh

HARD SKILLS

- Experienced in cloud engineering: deploying, managing, and scaling applications
- Proficient with Linux OS administration, configuration, and optimization
- Extensive full-stack development across diverse technologies and frameworks
- Practical experience implementing AI Agentic solutions

PROJECTS

Frost — Programming Language Built in Haskell

- Statically typed language with clean and responsive syntax.
- Frost compiles to LLVM IR, providing high performance and compatibility with a wide range of platforms and toolchains.

OpenAI PDF Describer

- Developed a tool to convert PDFs into textual descriptions using the OpenAI API, for use as contextual input for **LLM agents**.
-

SOFTWARE LANGUAGES

- **Programming**
 - C/C++, Python, Java, Go, JS/TS
 - **Web Technologies**
 - React, Next.js, Angular
 - Nodejs, Nestjs
 - **Database**
 - MySQL, PostgreSQL
 - **Infrastructure**
 - Docker, Jenkins
 - **Cloud**
 - AWS, Google Cloud
 - **Version Control**
 - Git
-

LANGUAGES

- English (C1 - B2)
- Spanish (C2)
- Catalan (C1)
- German (A1)
